CASE #16377

The following errors were made on the paperwork submitted for samples collected at this site on May 8 and 9, 1991.

Leachate samples LW1, LW2, MSD and duplicate collected May 8, 1991 should be classified as a leachate matrix. These samples were incorrectly classified as groundwater samples.

The yellow copies of the Chain-Of-Custody forms were accidentally included in the shipment to the laboratories.

The sample description for sample EHM04/MEKN03 should be "4" rinsate. The sample was incorrectly labeled as leachate.

On May 8, 1991, the shipment was described as complete on both the ITR and the OTR. The shipment was not complete. The shipment was completed on May 9, 1991.

The ABN fraction of sample EHW89 was erroneously sent to the inorganic lab. The error has been corrected. The SMO has arranged to send the ABN fraction to the correct organic lab.

The MSD for LW2 was erroneously given a separate OTR number of EHM02.  
The correct OTR number should be EHM01.
